

LeClasp™ : One Patent. Two Products.

And... 800,000-Units Sold in Canada.

The Patent.

LeClasp features a «figure-eight» patented design that opens easily with a simple thumb and index finger squeeze on the diagonal lines to effortlessly add and remove your «KEYS» and «jewellery» too.

The KEY Holder Benefits:

For added convenience, we suggest utilizing the four (4) split rings included to manage (group) most frequently used keys in «sets» of 2-4 per split ring.

Wow... You can remove your «sets» of keys even while wearing work gloves and... winter mittens!

Hmmm... Easily clasps, hooks and attaches personal stuff too.

Also... Hastily transforms into an effective «hand-clasped» self-defense device when walking, jogging, vacationing, travelling or... departing a bar alone!

The JEWELLERY Holder Benefits:

Perfect for anyone who needs to remove precious and valuable jewellery for sports, hygienic or workplace safety reasons. Wedding rings, bracelets, wristwatches, necklaces, earrings & most piercings are kept safe and secure - clasped as one - ready for safekeeping in a pad lock locker (gym, arena, pool, place of work), vehicle glove box, travel luggage and brief case. Also... recipients lose less jewellery.

LeClasp KEY Holder Testimonials:

«Simply the best key holder ever!»

- «Wow... No more broken fingernail nails.»
- «Ingenious. Why didn't someone think of it before?»
- «It makes adding and removal of keys a problem of the past. No need to fish keys thru split rings.»
- «Solid brass means there are no parts to break and no springs to come loose. Many of our employees and customers reporting years of trouble free use.»
- «Every day our customers use it, they are reminded of our brand name and toll free phone number too.»
- «At last a classy, distinctive and easy-to-carry gift beyond travel mugs, caps, writing instruments, etc.»

LeClasp JEWELLERY Holder Testimonials:

NEW

«Brilliant... A «portable» jewellery box!»

- «We're constantly reminding kids to remove rings, earrings and wrist watches in the gymnasium. A unique solution to a growing problem.»
- «This would benefit my company as our strict no jewellery policy does not allow workers to wear dangling jewellery in the plant that can come into contact, get caught and stuck against objects, equipment & moving parts of machinery.»
- «Jewellery is kept safe and secure - ready for safe-keeping in my locker at the arena and golf club.»
- «Useful in hotel rooms on business trips & vacation.»
